PROFESSIONAL SUMMARY

Strategic Data Analyst specializing in Data Engineering & Automation. Engineered pipelines consolidating 900+ disparate sources, improved forecasting accuracy by 27%, and **identified \$30K in annual cost savings** through patient acquisition analysis. Shifted multi-region expansion strategy by diagnosing an 11% retention drop and proving new clinic cohorts **outperformed historical benchmarks by 29%**.

PROFESSIONAL EXPERIENCE

Data Analyst, COB Solution (US Healthcare) | US time zone

Nov 2024 – Present

- **Strategic Growth Analysis:** Diagnosed multi-region plateau by **identifying 11% patient frequency drop**; performed ramp-up cohort analysis proving new clinics outperformed historical benchmarks by 29%, directly pivoting executive strategy from marketing spend to retention initiatives, validated by discovery of **\$30K in inefficient acquisition** channel spending.
- **Forecasting & Data Infrastructure:** Built automated Python pipeline processing 10K+ weekly records (27% accuracy improvement), optimized Snowflake schema (**40% query performance gain**), and automated 5+ manual reports **saving 10+ hours/week**.
- **Profitability Modeling:** Designed Break-Even Analysis integrating labor rates, operational hours, and fixed overhead to calculate visit volume thresholds, enabling proactive **identification of at-risk clinic locations**.

Service Engineer, Lab Solutions | Cairo, Egypt

Nov 2023 – Oct 2024

- Translated complex technical specifications into business value for healthcare stakeholders; delivered 15+ technical demonstrations and training sessions to clinicians.

SKILLS

- **Data & Analytics:** SQL, Python (Pandas, NumPy, Scikit-learn), Snowflake, ETL/ELT, Advanced Excel
- **Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Methods:** Cohort Analysis, Retention Modeling, Predictive Forecasting, Financial Modeling, A/B Testing
- **Tools & Collaboration:** GitHub, ClickUp

KEY PROJECTS (Full portfolio on [GitHub](#))

End-to-End Clinic Data Infrastructure & Strategic Growth Review

Dec 2025

- Engineered Python pipeline **consolidating 900+ inconsistent Excel** files using custom validation algorithms ("Header Hunting" + "Peek Test") to standardize disparate data structures
- Designed hierarchical "Waterfall Matching" reconciliation (Exact → Fuzzy Logic) to merge **850K+ clinical logs with billing records**, recovering thousands of orphan revenue entries
- Delivered Power BI executive dashboard revealing **10.7% retention decline**, directly informing 2026 strategic pivot

EDUCATION

Associate Data Scientist, DataCamp | Remote

May 2024 – Sep 202

- Completed a 90-hour track covering data management, EDA, statistical modeling, machine learning, and data communication.

Bachelor of Biomedical Engineering, Al-Shorouk Academy | Cairo, Egypt

Oct 2018 – Jul 2023

- Grade: Very Good | Developed an IoT wearable device as a graduation project, earning an excellent score.
